

CHAPTER V CONCLUSION AND SUGESSTION

This chapter comes as the last part of this research, which consists of conclusion and sugesstion. The conclusion is drawn based on the result of this research, while sugesstion is intended to give information for the readers.

A. Conclusion

The researcher found some elements of code mixing. It involved the the types and reason of code mixing, the researcher used theory of Hoffman in Pardede and Kisno (2012:130) the type of code mixing are intra-sentential code mixing, intra-lexical code mixing and a change of pronunciation. The announcers often used code mixing by mixed Indonesia into English or English into Indonesia language, but sometimes they also used English and Arabic language as greeting in closing conversation for a humorous effect in conversation.

Besides that, the researcher also found the reason of code mixing that used by radio announcers. The researcher used theory of Saville-Troike (2003:56) the reasons are for a humorous effect, the real lexical need and to exclude the other people. The announcer used these reasons conveyed on the situation context of conversation.

From it can be concluded the Pro 2 FM radio announcers used code mixing in their conversation with participant and listener, they also switched their language with some reasons. By using code mixing it can help the radio announcers to make the interesting program to listener or participant. On the

other hand, code mixing helps the radio announcers to communicate with others more effective.

B. Sugestion

The code mixing which happen in Indonesian speakers, especially in radio broadcasting are varied and show many aspects, including the social class of the speakers. The ability to mix the codes by turns in utterances is a very useful skill to make a good relationship in society to get better carier. Code mixing is the interesting phenomenon was analyzed but the result of this research is still not enough to represents all code mixing phenomenon which happens in Indonesian radio announcers.

In this research, the researcher only did a research to analyzing and explaining the types and reason of code mixing that used by Pro 2 radio announcers in *Direct* program. There are many sources or object that can be used in analyzing code mixing such as novel, newspaper and book to find out the phenomenon of sociolinguistic especially code mixing. Finally, the researcher suggests the next researcher who has interest to this topic may get a chance to continue the research and can do it in larger scope.
