CHAPTER V
CONCLUSION AND SUGGESTION

Related to the findings of this research, there are two points are conclude in this chapter includes: conclusion and suggestions. The conclusion of this research are students at STKIP PGRI Sumatera Barat have some reason or perception that will discuss this chapter. This research will give suggestions for the researcher, the students, and the educators.

A. Conclusion

This research is about perception about plagiarism in academic writing. The purpose of this research is to analyzed the English students' perception about plagiarism in academic writing in STKIP PGRI Sumatera Barat. The research was conducted July 28 at STKIP PGRI West Sumatera Barat. The researcher used questionnaire and interview as to collect the data. Based on findings discussed on chapter IV, in fact, the student was still doing plagiarism, but there was student did not plagiarize and there were several perceptions that found by the researcher, there were may to do, undecided and may not to do. The students who said that plagiarism may do, because their said that plagiarism not to very serious. Next, the student said that plagiarism that was confused, because according to them, actually plagiarism may not to do, but when they have some deadline project, do not have same idea, and lazy to make the project, so they force to do the plagiarism. Last, the student have perception that plagiarism was may not to do. Because they think plagiarism was very dangerous. If someone who do plagiarize,
he will get punishment from the lecturer maybe, and if he still do plagiarism so, they will get punishment from institution like DO (Drop Out) from campus.

**B. Suggestion**

In this section, the researcher give suggestion to did not plagiarism, The student should always study and read a book to add the knowledge so if the student make a project they should not difficult to think their idea. And then, the student should avoid plagiarism with practice the thing that avoid plagiarism such as increase understanding about paraphrasing. To the reader it is hoped that the next researcher conduct a research in wider scope and more complete research findings.
