

CHAPTER V CONCLUSION AND SUGGESTION

In this chapter, the researcher was concluded and give suggestion. The researcher was concluded based on the data that the researcher got during the researcher conducted this research. Researcher also give suggestion related the finding in this reseach. Therefore the researcher explains as bellow:

A. Conclusion

Question is one ways that can be use by the teacher to do interaction with the students. It is a teachers' ways to increase students participation in teaching learning process. Then it can help the teacher to build the students understanding about the lesson. there are three kinds' type of teacher question in teaching learning process. There are focusing, prompting and probing question. The functios of teachers questions use by English teachers are to make the students have motivation, focus attention on the lesson and to increase the students understanding about the lesson.

In this research, the researcher analyzed the teachers question in teaching learning process at SMA N 1 Padang Ganting, Batusangkar. As mentioned in chapter I, the purpose of this research was to describe the types and function of question used by English teacher in teaching learning process. The data that the researcher got from observation and field note that the reseacher had done at SMA N 1 Padang Ganting, Batusangkar.

After analyzing the data from the observation and field note, the researcher could describe that the teacher used question in teaching learning process. Therefore, the teachers used question to make the students pay attention in

teaching learning process, to increase their participation, and to build their understanding about the lesson.

B. Suggestion

Dealing with the research finding, it could be view for students, teacher and also the researcher. Therefore, the researcher has some suggestions. First, for the English teacher should be more pay attention related to the teachers question in teaching learning process. By giving question, the teacher will know the students understanding about the material that they learn. Meanwhile, for the students, they should pay attention when the teacher gave question to them in teaching learning process. because that the teacher given to them, to know what they should do in learning. for the reseacher, it will be additional knowledge related teachers questions. Using question can help the teachers to know the students understanding and increase the students' participation of the lesson in teaching learning process.
